

REGINE SAM YUNN HONG

Senior Project Manager & Technology Delivery Leader | Programme Governance | Engineering Leadership

Selangor, Malaysia | +6012 331 2821 | regine.sam@gmail.com | [linkedin.com/in/regine-sam](https://www.linkedin.com/in/regine-sam) | reginesam.github.io/portfolio

PROFESSIONAL SUMMARY

I'm a technology delivery professional with 25 years of experience — the last 10+ in a global wealth and people intelligence company, delivering platforms that surface individual net worth, philanthropy, executive affiliations, and company data for enterprise clients worldwide. That journey means I can do three things most people can only do one of: **manage complex programmes, understand the technical architecture well enough to push back on estimates and ask the right questions, and lead engineering teams through growth and change.**

At Wealth-X and Altrata, I grew the Malaysia engineering team from 3 to 16 people across two restructures, served as Acting Head of Technology, and managed 3–5 concurrent workstreams as part of a 13-team platform build that consolidated five acquired brands into one. I've built foundational platform capabilities from scratch, rescued delayed projects at CTO request, and maintained a **~95% on-time delivery rate** throughout.

Fluent in **English, Mandarin, Cantonese, and Malay**. PMP® exam preparation underway (prep course completed Apr 2026). ITIL® certified. Trained in GenAI Essentials and MLOps Engineering on AWS.

CORE SKILLS

Programme & Delivery Concurrent project management · End-to-end delivery · Milestone planning · RAID management · Dependency tracking · Release coordination · Financial & Resource Management · Scrum of Scrums · Agile & Hybrid delivery

Governance & Risk Risk escalation · Scope management · Stakeholder alignment · Executive communication · SteerCo reporting · Portfolio governance · Delivery recovery

Technical Depth AWS Cloud Delivery · Salesforce Integration Delivery · REST APIs & microservices · Elasticsearch · Databricks · Java · Architecture review · Code review · QA oversight · SDLC governance

Engineering Leadership Team building · Hiring & performance management · Mentoring · Capacity planning · IT operations · Vendor management

Tools Jira & Confluence (Atlassian Cloud Admin, 10 years) · AWS · Salesforce CRM · Databricks · APIs & data platforms

Languages English (Proficient) · Mandarin (Native) · Cantonese (Native) · Malay (Proficient)

PROFESSIONAL EXPERIENCE

Senior Project Manager (Technology Delivery Lead) Apr 2023 – Dec 2025

Altrata (formerly Wealth-X) · Selangor, Malaysia

Engineering teams — Malaysia, UK, US, India · Global clients

Altrata was built from a consolidation of five acquired data intelligence brands — BroadEx, Boardroom Insider, RelSci, Wealth-X, and WealthEngine — into a single unified platform. 13 scrum teams (7 internal + 6 vendors) stood up to deliver it. I was part of a PM group led by the Head of Programme Management, owning delivery of key platform workstreams.

- Managed 3–5 concurrent technology workstreams across AWS data platforms, Salesforce integrations, APIs, and enterprise reporting — across cross-functional global teams spanning Malaysia, UK, US, and India.
- Built RAID governance, Scrum of Scrums cadence, and SteerCo reporting from scratch across all assigned workstreams.
- Delivered the AAA (Authentication, Authorization & Account) platform from scratch — the security backbone for all Altrata products — coordinating 3 cross-functional teams over 10 months. Established pentest sign-off as a mandatory release gate, adopted programme-wide.
- Rescued Bedrock Phase I (4 weeks delayed): brought in by the CTO, reassessed scope and estimates, presented a CTO-approved revised plan, and delivered before a non-negotiable vendor contract deadline despite significant data integrity issues.
- Won Pillars of Success Award (Q4 2024) for on-time delivery of the Executive & Company API and Salesforce Integration Phase 1 — recognized for cross-team leadership and stakeholder coordination under sustained delivery pressure.

Selected Projects

- **AAA — Authentication, Authorization & Account** — Security backbone for all Altrata products, built from scratch. 3 cross-functional teams, 10 months.
- **Salesforce Integration — C&E, Relationship, Wealth (3 phases)** — All 3 phases published to Salesforce.org. Managed API dependency chains, monthly SteerCo, biweekly SoS throughout.
- **Profile & Search API — C&E + Wealth** — Central integration layer for all Altrata products. Phase 1 on-time — direct contributor to the award.
- **Bedrock Phase I** — CTO-directed rescue. Scope reset under pressure. Delivered before vendor contract expiry.
- **Profile Requests — Credit-Based Request Management** — 3 integrated components across 2 engineering teams. Released as part of Web App launch on time.
- **Wealth Profile Build** — AI-powered wealth data extraction pipeline. Prototype verified and signed off by PO.
- **Annual Report Extraction System** — AI-powered annual report extraction. Fixed Jan 2026 go-live. Delivered on time.
- **Altrata Insights — BI & Real-Time Analytics** — AWS CloudWatch → Databricks pipeline. Consolidated 2 BI workstreams. On hold (budget).

Director of Software Development May 2020 – Mar 2023

Wealth-X Services Sdn. Bhd. · Selangor, Malaysia

incl. Acting Head of Technology (~6 months, 2021)

- Led a 16-person engineering organization across software development, QA, DevOps, and application support on AWS — managing infrastructure spend against monthly budgets and reporting delivery health to CTO and senior leadership.
- Served as Acting Head of Technology for ~6 months during a leadership transition — took on full IT operations responsibility including helpdesk, production monitoring, AWS cost management, incident response, and vendor renewals.
- Standardized Agile delivery frameworks across teams, improving delivery efficiency by ~20%; established a resource planning calendar template adopted across all scrum teams.
- Built portfolio governance and C-level reporting structures from scratch — providing consistent visibility into delivery health, resource utilization, and strategic alignment.
- Oversaw hiring, performance management, and capability development across engineering managers and team leads; several progressed to senior leadership positions.

Selected Projects

- **Web UI Rebuild** — Full platform UI revamp aligned to company mission. Delivered on time.
- **AWS Aurora Migration** — MySQL 5.7 to AWS Aurora ahead of EOL. Zero production disruption.
- **User Statistic Dashboard** — Real-time usage analytics in Salesforce CRM for sales and account management teams.

Senior Software Development Manager Oct 2018 – Apr 2020

Wealth-X Services Sdn. Bhd. · Selangor, Malaysia

- Led Agile Scrum teams delivering 10+ software initiatives with a ~95% on-time release rate.
- Managed day-to-day IT operations alongside delivery — helpdesk triage, production monitoring, AWS cost tracking, data anomaly detection, and incident management.
- Replaced USD \$20K/month third-party Transparenssee search subscription with a proprietary Elasticsearch solution — involved in gap analysis, architecture confirmation, code reviews, and performance testing.
- Mentored 8 developers; several progressed to senior and lead roles. Managed performance reviews, KPI tracking, and recruitment.
- Partnered with Product on roadmap planning and delivery prioritization.

Selected Projects

- **Search Engine Migration — Elasticsearch** — Replaced Transparenssee. Delivered before subscription expiry. ~USD \$20K/month saved.
- **On-Premises Screening Software Suite** — Windows + macOS (VirtualBox). Personally built macOS installer in ShellScript & AppleScript. Presales + on-site installation.
- **Credits Migration** — Quota to credit-based system. Managed Salesforce CRM dependency that threatened timeline — escalated, resolved, delivered on time.

Application Development Manager Nov 2013 – Oct 2018

Wealth-X Services Sdn. Bhd. · Selangor, Malaysia

- Maintained hands-on Java development alongside managing full delivery lifecycles for a 7-person team on AWS-hosted systems.
- Grew the Malaysia team from 3 to ~12 people across two expansion rounds when the Singapore office closed in 2016.
- Sole developer on the internal Salesforce CRM integration API — built end-to-end from requirements to production (2015–2016).
- Managed production deployments, BAU support, and feature enhancements across Windows and Linux environments.
- Oversaw vendor engagement and technical delivery for the Dossier Cash Calculator migration (2014).

EARLIER CAREER · SOFTWARE ENGINEERING & LEADERSHIP · 2000–2013

Held progressively senior software engineering and team leadership roles in Malaysia. Hands-on Java developer delivering enterprise systems across banking, immigration, logistics, and eCommerce domains.

Senior Software Developer · S5 System Sdn Bhd · May 2012 – Nov 2013

Web-based modules for a national security border control and immigration management system. JSF, Hibernate JPA, MySQL.

Team Lead · Tradeship Sdn Bhd · Sep 2006 – Apr 2012

Led team delivering a Shipping Container Repair and Tracking System. EDI integration using JSF, EJB, Hibernate, Oracle.

Senior Consultant I · Agenda Solution Sdn Bhd · Aug 2005 – Sep 2006

Enterprise enhancements for DHL's global Delivery Order Tracking System and Telekom Malaysia's COINS-ES platform.

Java Developer · Silverlake Corporation · Jun 2004 – Jul 2005

SCIB Internet Banking System — treasury, remittance, and inter-bank transfer modules. SQL query optimization for transaction performance.

IT Specialist · Software Developer · Senior Software Engineer · Software Engineer

IAS Sdn Bhd · Krisbiz Sdn Bhd · PDX BizSystem Sdn Bhd · 2000–2004

eCommerce, procurement, and enterprise systems — full SDLC. Led junior developers. Where the 25 years began.

AWARDS & RECOGNITION

Pillars of Success Award Q4 2024 · Altrata Recognized for on-time delivery of the Executive & Company API and Salesforce Integration Phase 1, under sustained cross-team delivery pressure across a 13-team global platform build.

CERTIFICATIONS & TRAINING

PMP® In progress — Prep course completed Apr 2026, planning to sit exam before July 2026

MLOps Engineering on AWS Amazon Web Services · Dec 2025

GenAI Essentials on AWS Amazon Web Services · Dec 2025

ITIL® Foundation IT Service Management · Apr 2014

EDUCATION

BSc (Hons) in Computing Staffordshire University · 2001

Higher Diploma in Business Information Technology APIIT College · 1999

Certificate in Computer Studies Tunku Abdul Rahman College · 1997
